CAREER OBJECTIVE

TYBCA student looking for an internship where I can apply my Python, PHP and SQL skills to build real-world projects and keep learning from experienced developers.

EDUCATION

BCA (TYBCA), Sutex Bank College of Commerce and Science	Sem 1-4 results: 8.18, 8.18, 7.55, 8.36 (Sem 5 pending)
12th, GSEB, E.E. Dawjee Memorial English Medium School	92.08
10th, GSEB, E.E. Dawjee Memorial English Medium School	96.74

TECHNICAL SKILLS

Web and Programming: HTML, CSS, Python, PHP
Version Control: Git, GitHub
Database: SQL, MySQL

PROJECTS

Exolia Travel Website | PHP, MySQL, XAMPP
- Dynamic travel website with user registration and login, and browsing of destinations and packages.
- Booking with booking history, search and filter, and an enquiry form.
- Admin panel to add, edit and delete content, with data stored in MySQL.

Student Management System | MySQL
- Full CRUD application to manage student records: add, update, delete and search students.
- Data is stored and queried in a MySQL database.
- Reports for attendance and grades.

Expense Tracker | Python, SQLite
- Console app to add, view and delete expenses, with a spending summary by category using SQL GROUP BY.
- Used parameterised queries to prevent SQL injection.

Quiz Game | Python, OOP, JSON
- Built with Question, Quiz and Leaderboard classes; questions are loaded from a JSON file.
- Random questions in every game, input validation and a saved leaderboard.

Tic-Tac-Toe with AI | Python, Minimax
- Play against the computer in Easy mode or Unbeatable mode, which uses the Minimax algorithm with recursion.

Snake Game | Python, Turtle
- Three difficulty levels, pause and resume, collision detection and a high score saved in a file.

Hangman | Python, OOP, JSON
- Word categories loaded from JSON, a hint system, ASCII graphics and a win record.

LANGUAGES

English, Hindi and Gujarati (fluent)
